# MINI-SERIES

The lineup provides high accuracy and ease of use and meets a wide range of needs.

Measuring Microscopes

# MM-Series

The MM-series are products Nikon is most proud of, with a variety of enhanced features such as higher measurement accuracy and coordination with data processing systems.

- In addition to the easy-to-use design, an motorized vertical movement mechanism is available.
- Newly developed transmissive lighting enables to switch white and green LED light (MM-400N, MM-800N)
- Improved body rigidity enables the mounting of a stage with a stroke of 300 x 200 mm (only for the MM-800N)
- Digital image measurement is possible with the E-MAX (V2 set) measurement support system.
- The newly developed DP-E1A data processing unit combine high functionality and ease of use.
- The coarse/fine movement switching lever and RESET/SEND button are near the X/Y axis handle of the stage.
- Aperture diaphragm function for transmitted illuminator is available for both MM-400N and MM-800N, supporting the measurement of cylindrical parts.
- Power consumption has been reduced by 10%\*1 compared to the former MM-400/MM-800 series models. The manufacturer provides environmentally friendly products and complies with the RoHS Directive and other laws and

#### Universal Epi-illuminator Supports a wide range of applications.

LED Illuminator

A high-intensity white LED uminator for brightfield use.

Highly accurate measurement is achieved with proven optical technology and control functions.

### Improved height measurement accuracy

### Focusing Aid (FA)

A newly developed split-prism-type FA with a clear pattern makes it possible to accurately focus in the Z-axis and reduces height measurement errors caused by the depth of field of the objective lens. There are two types of patterns, light and dark, and it is possible to switch between them according to the surface properties of the test object.

### Improved lighting performance for wide range of needs

#### LED Illuminator

The newly developed diascopic LED illuminator has now both white and green light sources (excluding MM-200), and the operator can easily switch the light without inserting or removing filters. The high-intensity white LED lighting has a constant color temperature and the light modulator responds quickly, so efficient high-precision measurement is possible. Furthermore, it has low power consumption and long life.

# 8-segment LED Ring Light CYN-E1 (option for MM-type)

- Highlights the edges of samples that are difficult to see under normal lighting, such as plastic
- Selectable 8-segment ON/OFF LED with a large amount of light and a 30° angle of incidence.
- Compatible with 1x, 3x, 5x, and 10x measuring microscope objective lenses

# UNIVERSAL TYPE

Enhanced height measurement and a variety of illuminators make possible both an expanded observation area and high-precision measurement

# Enhanced height measurement

#### Focusing Aid (FA)

There is a newly developed split-prism type FA. It enables more accurate focusing and reduces measurement errors caused by the depth of field of the objective lens. (Must be used with the LV-UEPI FA illuminator.)

# Lineup of a variety of illuminators

- Universal Reflective Illuminator LV-UEPI2 Optimal illumination conditions can be linked to the field of view aperture, aperture diaphragm, and shutter.
- Universal Reflective Illuminator LV-UEPI Automatically opens the field of view aperture and aperture diaphragm when switching between brightfield and darkfield.
- FA Reflective Illuminator LV-UEPI FA Has the FA for more precise height measurement.

# **MM-200**

Compact, light, precise and easy to use measuring microscope for dimensioning and tolerancing

Shortens measurement time with its builtin 50 x 50 mm stage and rotating table.

Built-in light sources are all longlife white LEDs. The optional LED ring light enhances edge observation with the use of an oblique illumination angle.

Features a space-saving design with a footprint equivalent to an A3 size sheet, or 420 x 297 mm\*. \*Value does not include handles

### Illuminators

### 8-Segment LED Ring Light

Enables illumination from eight directions.

- Can be used with MM-400N/800N and E-MAX
- RS-232C cable comes standard
- E-BUS cable is required to control with E-MAX

# Fiber-optics Illuminator Set

Offers easily adjustable brightness. The ring fiber illuminator minimizes shadows caused by any unevenness on the sample surface. The bifurcated fiber enables illumination from two directions.

- Cannot be used with metallurgical microscope objectives
- Cannot be mounted when using 20x, 50x and 100x measuring microscope objectives

### Ring Illuminator Adapter

Can be used to mount fiber-optic, fluorescent lamp, and LED ring illuminator.

• Cannot be mounted with 8-segment LED Ring Light

# LED Ring Illuminator

Ideal for use in a production environment as LEDs have long product life. Uses white LEDs with a variable intensity control and constant color temperature.

- Cannot be used with metallurgical microscope objectives
- Cannot be mounted when 20x, 50x and 100x measuring microscope objectives are used

# Protractor Eyepieces (for MM Type only)

Note: Monocular adapter is required when using these eyepieces with trinocular tubes

### Digital Protractor Eyepiece\*

Rotate crosshairs in the viewfield to measure angles.

Display unit: 1 minute, 10 minutes

\*Not available for S and SL models

# 1-Minute Reading Eyepiece

Viewfield includes crosshairs and 60° lines. Angle indexes are read by appropriate microscopes.

Measuring range: 360°

# Viewfield includes crosshairs and

angle indexes. When the knurled ring at the lower section of the eyepiece tube is turned, the crosshairs and the vernier both rotate 180°.

10-Minute Reading Evepiece

# Direct C-mount Adapter

Used to install C-mount camera on the measuring microscope.

• LV-TV tube is required

The use of the CFI60-2 series of high-performance objective lenses is possible, further improving optical performance

# The TU Plan Fluor series of standard objective lenses with both excellent chromatic aberration correction and long working distances

This is a universal-type standard objective lens that make possible all observation methods with a single objective lens: brightfield, darkfield, simple polarization, differential interference, and epifluorescence using not only the visible region but also the UV region.

This new optical system combines excellent chromatic aberration correction and long working distances. The edge detection for the location being measured and operability have been improved, and a wider variety of samples can be handled.

The TU Plan Fluor and CFI L Plan EPI CR series use ecofriendly glass that does not contain lead, arsenic, or toxic substances, making them meet the environmental needs of the times.

# Tilting trinocular eyepiece tube

#### Tilting trinocular eyepiece tube

The LV-TT2 tilting trinocular eyepiece tube with built-in reticle offers comfort to all users, regardless of their viewing positions. The optical path changeover of 100:0/20:80 allows simultaneous use of a monitor.

# E-Max Series

### FOV Measurement with advanced digital image processing technology

Combined with the V2 digital camera, E-MAX series software provides various advanced measurements and processing functions, ranging from 2D data processing and image measurement, to data storage. Automated edge detection with sub-pixel processing enables more precise and repeatable measurement.

E-MAX V2 set

# DP-E1A

#### Data Processor with improved accuracy and ease of use

Effectively used in combination with a measuring microscope/profile projector, the DP-E1A quickly calculates geometrical features with simple and interactive operations. Measurement results are automatically memorized as teaching steps and can be easily used as a measurement routine.

#### Simple & interactive operation

Feature Oriented Operation allows the user to conduct measurements by following the graphics, providing a seamless measuring environment. Measurement results are automatically memorized as teaching steps and can be easily used as a measurement routine.

#### GD&T compliance

Geometric Dimensioning & Tolerancing defined by the ANSI Y 14.5M Specification is supported. In addition to Location Tolerancing such as True Position, MMC and LMC, determination of Form, Orientation and Runout can be conducted interactively.

#### Multi-language support

English, German, Japanese and various other Asian and European languages are supported.

# Application Software for Measurement Support/Data Processing System

# Custom Fit QC: Report and chart generating

Suitable for lot control of inspection data such as maximum value, minimum value, range, standard deviation, and process capability index.

- Customization of inspection result sheets are possible, in addition to the 10 standard sheets
- BMP and JPEG files can be pasted onto the inspection result sheets
- · Graphs can be automatically generated
- · Displays are adjustable between degree/minute/second
- Easy to generate histograms, X-R control charts, and scatter diagrams

#### Custom Create: Direct link to Excel worksheets

Measurement data from counters and/or data processors can be transferred directly to Excel sheets. Multiple worksheets can be transferred at once, achieving efficient measurements.

- Compatible measuring instruments: MM-400/800 series, DP-E1A, V-20B, V-12B
- Allows data transfer to customized inspection-result sheet forms
- 3 standard inspection result sheets are available

#### Operating environment:

• Windows®7 or Windows®10 • Microsoft Excel® 2003 or later • Required memory: 512MB (min) • Codevelopment: Aria Co., Ltd.

# Counters

#### 3-Axis/2-Axis Counters

The display unit can be mounted on either side of the main body. Counters can be connected with data processors and digital printers via the RS-232C port.

3-axis counter

#### XY Reset Switch

Can be attached to the main body to easily reset values while using the stage.

X/Y-axis

#### Counter Remote Switch

Enables remote control of the counter's RESET and SEND.

# Digital Thermal Printer TSP743II

Connect to the MM-400N/800N control box to print out values from the counter.

Foot Switch

Used to send load command to DP-E1A. Frees both hands to enhance measurement efficiency.

# Calibration Scale 300 mm

Used to calibrate feeding accuracy of stage up to 300 mm. The scale is made of low expansion glass to minimize thermal error. Both 10 mm-interval sensor patterns and calibrations are provided.

Accuracy: Within 1 µm against compensation values.

# Vibration Isolation Table

Provides a stable, even surface by reducing floor vibrations. Compatible with measuring microscopes, data processing systems, external light modulators, and computers.
