Microscope Camera

Digital Sight 1000

Equipped with a 2 megapixel CMOS image sensor, it can capture full HD microscope images. By connecting a microscope to this camera and HDMI monitor, movies and images can be captured and saved onto a pre-inserted SD card in the camera.

2.0 megapixel | Color | Full HD

DS-Fi3

Three main features of the previous models, high-resolution, high sensitivity and low noise, and high-speed live display are offered in 1 camera.

5.9 megapixel | Color | High-resolution

Digital Sight 10

This high-resolution camera captures both color and monochromatic images at up to 6,000 x 3,984 pixels. This enables the wide range of images to be captured and then many of them to be stitched together making a single and large combined image.

23.9 megapixel | Color/Mono-chrome | High-resolution

Frame Rate	30 fps (1920×1080)	30 fps (1440×1024)	66 fps (1920×1080)
Max Recordable Pixels	1920×1080	2880×2048	6000×3984

Imaging software NIS-Elements Advanced Solutions for your Imaging World — for a tablet PC L

Intuitive control of microscope cameras from tablet PCs

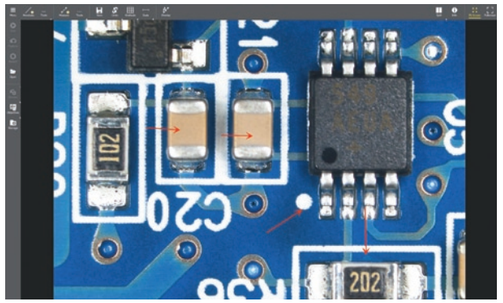
Easily view images and control image acquisition settings for the Digital Sight 1000/ DS-Fi3/Digital Sight 10 camera on a tablet PC using NIS-Elements L.

(Compatible OS: Windows® 10 Pro)

* Nikon provides confirmed compatible tablet PCs with up-to-date specifications. Contact Nikon for details.

User Interface for naturally simple operation

NIS-Elements L displays various menus for image capture, saving, display, measurement and annotations using intuitive icons. It also supports touch screen operation.



Scene mode

Ten camera setting patterns for optimal color reproduction and contrast for each microscope light source, observation method and type of sample, as well as custom settings, can be selected.

Industrial Scene Mode

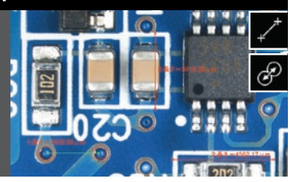
- Wafer/IC
- Circuit board
- Metal
- Flat Panel Display

A wide variety of tools

NIS-Elements L enables the conducting of simple measurements on images, with input of lines and comments. These can also be written onto and saved with the image, and measurement data can be output.

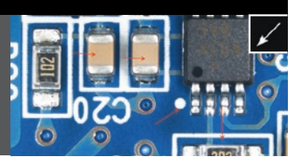
Measurement function

- Line distance
- Area
- Circle
- Circle disance
- Pitch distance
- Angle



Annotate function

- Line
- Arrow
- Text
- Marker
- Polyline



Graticule/scale function

- Crosshairs
- Simple crosshairs
- Circle
- Grid
- Horizontal scale
- Vertical scale

Please refer to individual product brochures for further details.

Imaging software NIS-Elements Advanced Solutions for your Imaging World — for a desktop PC F D Br Ar

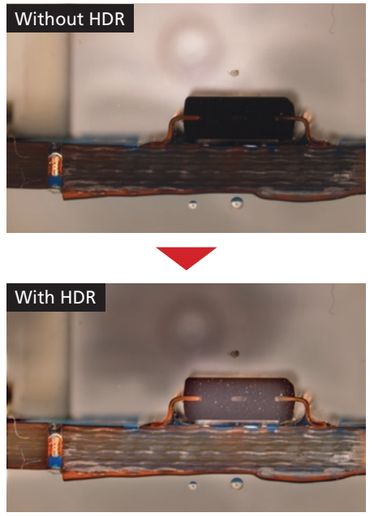
Integration with Nikon's Software Imaging Platform

Nikon's universal software platform, NIS-Elements combines powerful image acquisition, analysis, visualization and data sharing tools. With fully customizable user interfaces and seamless integration of Nikon microscopes, cameras and a wide variety of peripheral devices, NIS-Elements can serve as a simple interface for photo-documentation or power complex, conditional workflows with automated imaging and analysis routines. The NIS-Elements platform features various packages and software modules to meet the needs of even the most challenging applications.

HDR (High Dynamic Range) image acquisition

Ar Option Br D

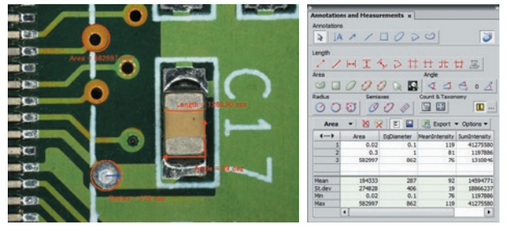
HDR creates an image with appropriate brightness in both the dark and bright regions in a sample by combining multiple images acquired with different exposure settings. It is also possible to create HDR image using multiple captured images.



Manual measurement and image annotation

Ar Br D

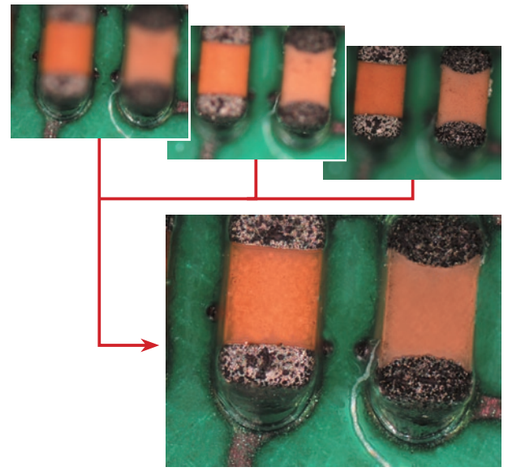
Manual Measurement allows easy measurement of length and area by drawing lines or an object directly on the image. The results can be attached to the image, and also exported as text or to an Excel spreadsheet.



EDF (Extended Depth of Focus)

Option Ar Br D

Creates a single, all-in-focus image from images of differing focus. Such images can now be created by simply turning the focus knob.

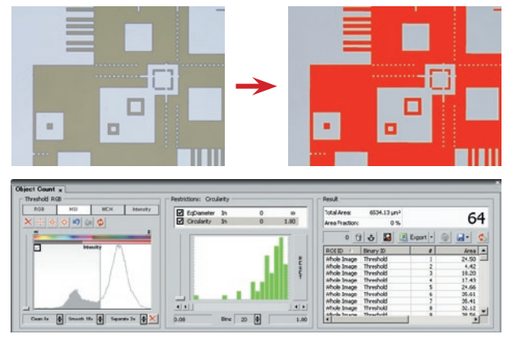


Selects the in-focus area and produces one all-in-focus image

Auto measurement (Object Counting)

Ar Br Option D

Performs binarization on images using previously set thresholds to measure the number, area, brightness, etc. of identified objects.



Objective Lenses

CFI60-2 / CFI60

Nikon's CFI60-2/CFI60 optical systems are highly evaluated for their unique concept of high NA combined with a long working distance. These lenses have been developed further and evolved achieving the apex in long working distance specifications, correct chromatic aberration, and an optimized lens weight.

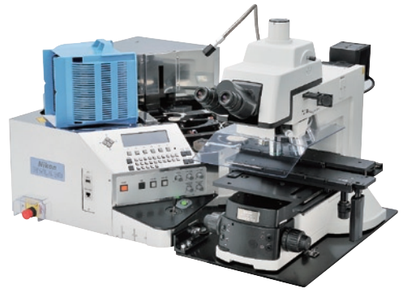
Wafer Loaders

NWL200 Series

Nikon's proprietary technology ensures reliable loading of ultra-thin 100 µm wafers. The NWL 200 series achieve highly reliable loading, suitable for inspection of next-generation semiconductors.



Wafer	Diameter	ø200 mm / ø150 mm
	Minimum thickness (standard)	300 um
	Minimum thickness (option)	100 um
Surface, back side macro inspection		✓

*Optional special wafer loader is also available. Please ask Nikon for detail.

Please refer to individual product brochures for further details.

Wide variety of stage strokes and magnifications are available for various customer requirements.

Main Body (Type / Stage Stroke)

Wide FOV Model

VMA

Model VMA-2520
VMA-4540
VMA-6555

Applications Electronic parts, resin molding parts, various mold parts, press parts, die cast parts, etc.

iNEXIV VMA-4540

Standard Model

VMZ-S

Model VMZ-S3020/VMZ-S4540/VMZ-S6555

Applications Semiconductor packages, high density PCB's, lead frames, MEMS, connectors, precision mechanical parts, etc.

NEXIV VMZ-S3020

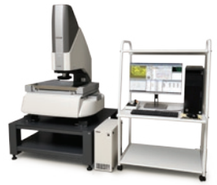
NEXIV VMZ-S4540

High-precision Model

VMZ-H

Model VMZ-H3030

Applications Micro boards (line width, height), next-generation semiconductor packages (WLP, bump height), precision molds, rewiring masks, MEMS masks, etc.



NEXIV VMZ-H3030

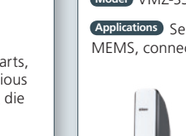
L = Length in mm

Zoom Heads

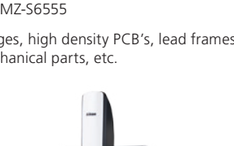
Type A



Wide FOV and long working distance enables comfortable operation. Laser AF and Touch Probe can be attached as optional accessories.

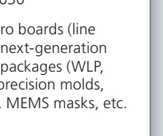
*Touch Probe is an option only for VMA series.

Type 1–4



Equipped with top, bottom, and oblique ring lights with adjustable angles. TTL (Through the Lens) Laser AF is a standard tool that can scan surfaces at 1000 points/second.

Type TZ



Equipped with 1-120x ultra high zoom ratio with 8 steps. Suitable for measurements of small targets up to several micrometers.

FOV	W(mm)× D(mm)	13.3 10.0	9.33 7.01	7.8 5.8	4.7 3.5	2.6 1.9	2.33 1.75	1.33 1.00	1.165 0.875	0.622 0.467	0.582 0.437	0.311 0.233	0.291 0.218	0.155 0.117	0.146 0.109	0.070 0.068	0.073 0.055	0.039 0.029	WD

45x High-magnification head																	5 mm

Brightfield Confocal/Brightfield Confocal *The FOV of the bright field optics are indicated.

The NEXIV VMF-K series can perform full-field height measurement using confocal optics as well as 2D measurement with brightfield images. Special samples that are difficult to detect with brightfield can be clearly calculated with confocal measurement.

Brightfield image

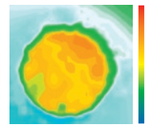

Image with height information

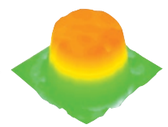
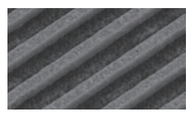


Bird's-eye view

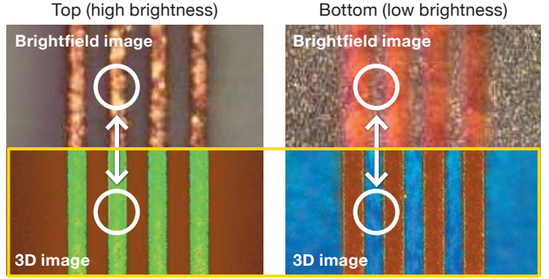
High contrast sample (copper wire on print board etc.)

Confocal observation accurately captures the shape, even for samples that are difficult to measure accurately in brightfield, due to effects such as halation.



Actual shape (SEM image)

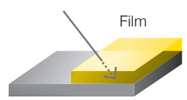
Top (high brightness) Bottom (low brightness)



Both top and bottom can be measured

Highly transparent and thin samples (metal surface films, semiconductor resists, etc.)

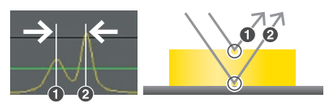
For transparent samples with unstable light reflection, confocal observation can accurately detect two points: the transparent surface and the metal surface.



Brightfield

Unstable reflection makes it difficult to detect the exact location

Confocal



Both the top and bottom heights can be detected accurately.

Please refer to individual product brochures for further details.

Measuring Microscopes

Focused on high-precision and easy operability, a wide range of MM-products are available.

		Basic Model MM-400N	Large-Stage Model MM-800N

MM Type

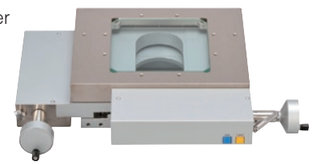
With Nikon's optical technology and highly precise stages, high-precision measurement can be achieved.

Universal Type

Offers a line-up compatible with dimensional measurement and various observation methods.

High-Precision Stages

The coarse/fine changeover lever and the RESET and SEND buttons are located near the X- and Y-axis knobs.

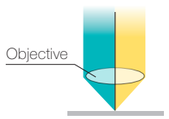


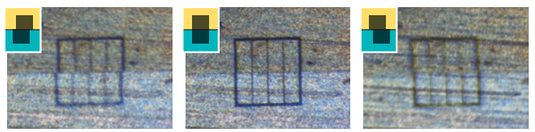
X-axis Knob

Y-axis Knob

Focusing Aid (FA)

The Split-Prism FA delivers sharp patterns to allow accurate focusing during Z-axis measurements.
FA patterns are clearly visible because they are split vertically.





Front Focus | Focused | Rear Focus

Please refer to individual product brochures for further details.

Profile Projectors

Nikon's profile projectors apply the principles of optics to the inspection of manufactured parts by projecting magnified silhouettes on a screen.

		Desktop Model V-12B	Large-Screen Model V-20B
Stage Size/ Loading Capacity	50×50 mm / 5 kg	✓	✓
	100×100 mm / 15 kg	✓	✓

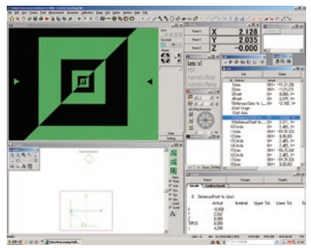
Data Processing Systems for Measuring Microscopes and Profile Projectors

Data Processing Software

E-MAX

Provides the user with various advanced measurements and processing functions. Automated edge detection with sub-pixel processing enables more precise and repeatable measurements.

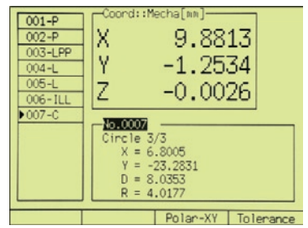


Connected with profile projector, data processing functions only

Data Processor

DP-E1A

Effectively used with a measuring microscope / profile projector, it quickly calculates and processes measurement data. Feature Oriented Operation of the DP-E1A allows the user to conduct measurements with the graphics, providing a seamless measuring environment.



Connected with profile projector, retrofit counter and DP units are required.

Please refer to individual product brochures for further details.

Autocollimators

Autocollimator is an easy-to-use but precise metrology instrument for angularity, parallelism, perpendicularity, straightness of precision components machine guide-way and many other applications.

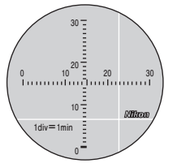
Brightfield Type

6B-LED

Utilizes hallmark Nikon optics to illuminate surface details.

Darkfield Type

6D-LED



Optimal for measuring small, flat mirrors.

Observation method	6B-LED: Brightfield, 6D-LED: Darkfield
Readout system	Adjustment in viewfield and reading on micrometer
Measuring range	30 minutes of arc (both vertical and horizontal axes)
Minimum range	0.5 seconds of arc

Plane Mirror C

Both sides are perfectly parallel, permitting its use as a reference for non-reflective surface. Also useful for measuring extremely small angles where a smaller mirror is desirable.

*Wooden case provided.

Outer diameter	30 mm
Thickness	12 mm
Parallelism	2 seconds of arc

LED Illuminator AC-L1

LED illumination unit for retrofitting onto Autocollimator 6B/6D illumination unit.

Power source	AA batteries×2, AC adaptor

DIGIMICRO

With built-in photoelectric digital length measuring systems, DIGIMICRO offers flawless contact measurements of dimension, thickness, and depth.

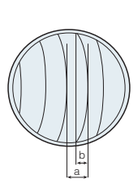
Main unit	MF-1001	MF-501	MH-15M
Measuring range	0–100 mm	0–50 mm	0–15 mm
Accuracy (20°C)	3 µm	1 µm	0.7 µm
Measuring force	Downward direction 1.225 to 1.813N (variable to about 0.441N), lateral 0.637 to 1.225N	Downward direction 1.127 to 1.617N (variable to about 0.294N), lateral 0.637 to 1.225N	Upward direction 0.245N, downward 0.637N, lateral 0.441N *With lifting release
Operating temperature	0 to 40˚C		

Please refer to individual product brochures for further details.

Optical Flat / Optical Parallel / Standard 300 mm Scale

Optical Flat

The optical flat is used to check the flatness level of a surface provided with mirror-smooth finish.
Flatness level can be measured by observing interference fringes by placing the optical flat in contact with the sample.



Diameter	Glass (ø60 mm)	Glass (ø130 mm)
Thickness	15 mm	27 mm
Flatness	0.1 µm	0.1 µm

Optical Parallel

Both planes of the optical parallel have been precisely finished flat and parallel.
It is used to check the flatness and parallel levels of a sample by observing interference fringes by placing the optical parallel in contact with the sample.

Diameter	30 mm
Thickness	12 mm / 12.12 mm / 12.25 mm / 12.37 mm
Flatness	within 0.1 µm
Parallelism	within 0.2 µm

*Optical flats and parallels with greater precision are available by custom orders.

Standard 300mm Scale

Gauges stage travel accuracy up to 300 mm. Both 10 mm-interval sensor patterns and calibrations are provided. Made of the glass with low coefficient of thermal expansion, for minimizing thermal influence.

*Within 1 µm against compensation values.

Please refer to individual product brochures for further details.

⚠ WARNING	TO ENSURE CORRECT USAGE, READ THE CORRESPONDING MANUALS CAREFULLY BEFORE USING THE EQUIPMENT.
